I'm a cybersecurity and systems professional with experience supporting DoD and policy-driven environments, specializing in data protection, secure system administration, and mission-critical operations. With A+, Security+, and CYSA+ certifications, I support the United States Air Force by safeguarding sensitive information, strengthening encryption practices, and maintaining the integrity of high-security networks. My career is built on reliability, precision, and a commitment to protecting the systems that national defense depends on.

Outside of my formal role, I've expanded my skill set into full-stack development, teaching myself React, Firebase, and modern cloud architectures. In my personal time, I built a privacy-focused application using zero-knowledge principles, an approach where user data remains private and verification occurs without exposing sensitive information. The project was later accepted by a recognized technology provider and is currently live in their ecosystem, giving me hands-on experience with emerging identity frameworks and real-world deployment. I am also interested and have hands on experience using Artificial intelligent tools. Even in my personal life, I love to learn.

I'm motivated by the challenge of shaping secure, privacy-first systems and contributing to the next generation of technology that empowers users while protecting what matters most.

Employment History

Computer System Analyst

Bering Sea Environmental LLC

Sep 2023- Present

Newport News, Virginia 23606

I manage the secure handling, transfer, and validation of mission data across ICADS and PCDS environments, ensuring end-to-end data integrity, confidentiality, and compliance with DoD security standards. My work includes performing system diagnostics, resolving data-flow issues, and maintaining operational continuity for mission-critical systems. I operate daily within secure environments, supporting classified data workflows and enforcing strict access-control and protection requirements.

Within LMOC operations, I oversee radio communications and manage assigned radio frequencies to support pilots during live flight operations. I coordinate closely with aircrew to prepare, verify, and deliver mission

data for debriefs, ensuring accuracy and consistency across all reporting products used by pilots, instructors, and students.

I contributed to the development and submission of our TEMPEST package and supported our facility transition, applying knowledge of emission-security requirements, protected distribution systems, and secure facility configuration. I also perform monthly patching, system updates, and security hardening in alignment with DoD cybersecurity directives to maintain network integrity and reduce attack surface exposure.

I am proficient with PCDS, ANGEL, ICADS, SolarWinds, and MSCT, and I apply these tools to monitor system health, validate data accuracy, and maintain secure, mission-ready environments. Across all responsibilities, I maintain a strong focus on data protection, technical precision, and the secure operation of systems that directly support Air Force mission execution.

Owner

Virginia Natural Cleaning Solutions

Aug 2013- Aug 2023

Hampton, Virginia 23666

As the founder of Virginia Natural Cleaning Solutions, I built the company from the ground up with no formal business experience, driven purely by initiative, discipline, and a commitment to delivering high-quality service. I oversee all strategic and operational aspects of the business, including marketing, client acquisition, service delivery, financial management, and vendor coordination. I manage customer quoting, inventory control, and bookkeeping with accuracy and efficiency to support sustainable growth.

Virginia Natural Cleaning Solutions became a certified SWaM vendor and secured multiple HUD contracts specializing in property inspections and compliance-focused services. What began as a small idea serving one or two clients grew into a fully established, revenue-generating company within 18 months, expanding into apartment cleaning contracts across Newport News, Virginia. This rapid growth reflects my ability to scale operations, build customer trust, and run a service-based business with professionalism and consistency.

Lead Leasing Consultant

SL Nusbaum Reality Co.

Nov 2017- Feb2022

Newport News, Virginia 23606

Coordinated and executed the full leasing process, including application management, lease signings, compliance documentation, and moving scheduling. Responded to high volumes of leads with urgency and a sales-driven approach, converting prospects through tailored tours, consistent follow-ups, and strong product knowledge. Conducted property inspections to maintain quality standards and support retention efforts.

De-escalation is a core strength, I prioritize resident needs, resolve concerns with professionalism, and ensure every resident feels heard. When an issue requires additional support, I take ownership of the situation and connect residents with the right resources to deliver a solution.

Delivered standout performance by raising occupancy from 87% to 96% in just two months, directly increasing revenue and stabilizing the community. This achievement led to a promotion from Leasing Consultant to Lead Leasing Consultant, recognizing my ability to close leases efficiently, manage resident relationships, and consistently exceed performance expectations.

Leasing Consultant

Seminole Trail Management LLC

Sep 2013- Aug 2016

Newport News, Virginia 23601

Oversaw all core functions of the leasing office, including lease preparation, application processing, compliance documentation, and accurate financial entry for all rental payments. Managed collections, posted late fees, and coordinated the full eviction process in accordance with policy and state requirements. Handled resident requests and concerns with professionalism, strong communication, and a solutions-focused approach.

Delivered top-tier sales performance as the #1 leasing agent for five consecutive months, consistently converting leads, closing leases, and driving occupancy. During an ownership transition, I independently operated the property, managing all leasing, financial, and resident-facing responsibilities without disruption to operations. This period demonstrated my ability to run a leasing office end-to-end, maintain accuracy under pressure, and uphold high standards of service.
